NATURE NOTES

Spring Time Crappie

Spring has SPRUNG, which means warm days casting out into the shallow waters are ahead. In the spring when crappie are spawning in the shallows, anyone can cast a minnow and a bobber toward the bank and catch a ton of fish. "Crappie are becoming active as water temperatures warm into the low 50's," says Chris Chivetta, President of IBK Fishing Club, "Fish for them near submerged structures from 5 to 12 feet deep. Best lures have been jigs in 1/32 to 1/16 ounce size, with feathers or plastic baits. The Berkley Gulp Minnows are always a favorite!"

Crappie are very common in Missouri, mostly in Missouri's large reservoirs, rivers and streams, as well as many smaller public and private ponds. At Innsbrook, lakes that have good numbers and size of Crappie include Wanderfern, Alpine, Aspen and Innsbrook. "As we continue to rebuild the forage fish population in our larger lakes, we encourage everyone to limit harvest to four fish per day, per angler, larger than ten inches." To help monitor fish densities, the IBK Fishing Club encourages anglers to report the length and size of fish that are caught. Happy fishing!
