NATURE NOTE

Bird Feeding Basics

Many Innsbrook property owners are bird feeding experts. But for those just starting out in this fun endeavor, here are some basics from the Missouri Department of Conservation.

As winter approaches this year, think about a new form of family entertainment. Feeding birds is entertaining as well as a boost for our feathered friends. To attract a variety of birds, set up several kinds of feeders. Low platforms or ground feeding will bring in juncos, doves and sparrows. Higher platform feeders with sunflower seeds will attract cardinals, finches and chickadees. Hanging feeders will keep you entertained with the antics of woodpeckers and nuthatches.

By putting out a particular type of feed, you can choose the birds you want to attract. Black oil sunflower seeds are a good all-around choice, preferred by the goldfinch, cardinal, chickadee, purple finch, tufted titmouse and others. To attract a clientele that's a little different, hang some beef tallow in a suet feeder or mesh bag. Soon you'll see woodpeckers, as well as nuthatches and chickadees.

If you don't want to build or buy a feeder, simply spread your seed on the ground or on a deck. Also, keep a supply of water available.
