## Amenity Complex Construction Update

In September, the construction crew finished pouring the retaining walls on the south end of the East building. Steel beams and floor joists were delivered on September 8 and we should start to see the East building being erected. The footings on the West building will be dug this week or next as that foundation will start to take shape. We should also see our excavator contractor back soon to start the completion of our finished site: leveling for the parking lot, playground and remaining amphitheater grounds. Stay tuned for updates at [www.innsbrook-resort.com/property-owners/amenity-complex](http://www.innsbrook-resort.com/property-owners/amenity-complex).

Quiet hours are in effect every weekday before 7 a.m. or after 5:30 p.m. On Saturdays, loud noises are allowed only between the hours of 8:30 a.m. and 4:30 p.m. Thank you!

# NATURE NOTE

## Nighttime Flying

September is peak migration time for millions of songbirds heading to more tropical latitudes. Most migrate at night — orioles, warblers, sparrows, and tanagers. Like many nocturnal travelers, the Swainson's Thrush avoids predators by flying at night, because hawks migrate during the day. But mostly, night migration is attractive because the cooler, more stable air makes flight more efficient and prevents overheating. Even a tiny bird like a warbler — which weighs around a third of an ounce — can cover as much as 200 miles in a night! Researchers along the Gulf of Mexico have tracked more than a million birds headed to Central America on one busy night.
