### Innsbrook Community Clubs

Explore and share your interests with your Innsbrook friends and neighbors. At Innsbrook, there's more for community members to do than just enjoy the beautiful scenery (although we encourage that, too). Check out all of the Clubs at Innsbrook at the following link: <https://www.innsbrook-resort.com/community/clubs>.

Our Historic Village site is open during the Winter months, too! Just bundle up and take a drive over to see the artifacts on display in the 19th century restored log cabin. You'll be amazed at the array of items on display. Our ancestors were hearty souls and got along without many of the "modern day" conveniences we now take for granted. The restored Schoolhouse (heated), will give you the chance to warm up a bit, and at the same time give a glimpse into what education was like back in the 19th century.

The reconstructed barn site now has the concrete footings poured. We expect to have the floor completed before Christmas. Just as soon as the concrete work is finished, and weather cooperates, our reconstruction crew will begin the task of reassembling the barn donated to the IHS by the Vaughn family. If you'd like to be a part of this "once in a lifetime" experience, don't hesitate to let us know and we'll add you to the list of volunteers working on the project. Just send us your email address and you'll be notified when work is scheduled.

Becoming a member of the IHS is easy. Go to: [innsbrookhistoricalsociety.org](https://innsbrookhistoricalsociety.org) and download the membership form. If you have questions about membership in the IHS, don't hesitate to call Dave at 314.704.7001.

## AGAPE FOOD DONATION STATION

Help make a change this holiday season by donating to our Food Donation Station at Innsbrook!

All of the donations collected are given to AGAPE Food Pantry in Warrenton. AGAPE is a non-profit that serves more than 3,000 families in Warren County with a variety of programs. Their primary service is providing food to individuals and families who are facing food insecurity. Many of their clients do not know where their next meal is coming from and 50% of their clients are children.

Please help us continue to support AGAPE with your donation of non-perishable food items and personal care items.

Currently, the most needed items at the food pantry are:

- Canned fruit
- Canned vegetables
- Cereal
- Pasta
- Canned meals (ravioli, etc..)
- Chunky peanut butter

- Snacks
- Canned meat
- Personal care items
- Toilet paper
- Pet food

The AGAPE Food Donation Station is located at the Administration Building near the front door. Donations can be made anytime, whenever most convenient for you. Just drive up to the circle drive in front of the Administration Building (near the main gate entrance), open the lid and drop off your donations today!

*Due to freezing temperatures at night, please do not donate items that are susceptible to freezing.*

*Please do not leave trash or opened food items in the donation station - we do not want Innsbrook's wildlife to think that this is their personal food pantry or to cause damage to the facility. Thank you!*

## NATURE NOTES

### Holiday Journeys

We journey during the holiday season to see family and friends. Winter, like each season in the Show Me state, has its own outdoor options to view and experience. This time of year offers fantastic viewing of migrating waterfowl. The Mississippi flyway crosses through Missouri and open waters offer great viewing and photo ops of ducks, geese, swans, and other birds as they stop to fuel and rest on their way. Read on for some wild journeys to enjoy with family and friends this winter.

- Waterfowl have their own pre-flight checklist before becoming airborne. Many ducks, geese, and swans will signal to each other by shaking their heads up and down, side to side, or tipping straight up.
- Geese may also make a low or background humming sound while head nodding and then a louder honking sound while taking off.
- Swans need about 100 feet for takeoff, so they'll head out to open water first.
- Birds are built to fly with light bones, strong legs, and specially shaped wings.
- Doves actually have metal in their brains that enable them to navigate by sensing differences in the earth's magnetic field.
- Deer can run about 30 mph aided by long limbs and powerful shoulder and hip muscles.
- Mistletoe journeys along trees, attaching itself as a parasitic plant. Mistletoe grows naturally in southern Missouri in clumps high up on trees. It's rare in Missouri but can be found in river valleys on sycamore, elm, river birch and oaks.
- A snowflake's journey begins high in the earth's atmosphere when super-chilled water vapor crystallizes around a particle of dust. As a seed crystal circulates within a cloud, it changes in size and shape. The atmosphere the snowflake encounters along the way is what creates the snowflake's pattern.
